OUR STORY

After years operating as freelance artists and community champions supporting many other endeavours that allowed their passions to be expressed. Nat & Stella decided it was time to formalise their artistic purpose into a creative house that will one day be an institution and what better name that reflects their shared King of Hearts card in Cardology, astrologically bound, culturally in tune and historically aware, these 2 are on a mission to restore the golden age of Mansa's of Mali. Through the arts, Mansa hArts are on a journey of producing timeless work whilst amassing great wealth, shedding the struggling artist narrative for those who's purpose is to gift the soul.
